Processo de deploy

Aplicação está hospedada na plataforma Umbler (https://umbler.com/br) que oferece a opção de deploy automático.

Após cada commit realizado no branch máster é realizado um deploy da aplicação executado pelo servidor da Umbler, conforme mostra o print abaixo:

```
May 19 20:44:01   Hit CTRL-C to stop the server
May 19 20:44:01   http://172.31.0.66:3000
May 19 20:44:01   http://127.0.0.1:3000
May 19 20:44:01   Available on:
May 19 20:44:01   Starting up http-server, serving ./public
May 19 20:44:01
May 19 20:44:01   > http-server
May 19 20:44:01   > pwa-app-sge@1.0.0 start /usr/src/app
May 19 20:44:01
May 19 20:43:51   Hit CTRL-C to stop the server
May 19 20:43:51   http://172.31.0.66:3000

May 19 20:43:47   > pwa-app-sge@1.0.0 start /usr/src/app
```

Para que o deploy ocorra de forma automática, o servidor deverá ser configurado associando o repositório da aplicação. Assim que o diretório da aplicação for importado para a plataforma da Umbler, basta selecionar a opção "deploy automático", para cada commit realizado no branch máster será realizado o deploy da aplicação instantaneamente. Cada deploy gera um log e será exibida na página da aplicação, conforme mostra a imagem abaixo:
